MEMORANDUM FOR: COMOR Photo Working Group

SUBJECT: Target Priorities for KH-4 Mission 1033J

1. The attached target priorities for KH-4 Mission 1033J have been established in consultation with representatives of NRO and GMAIC.

2. The NRO has reported that sufficient film will be available to cover all of the priority missile targets every day, with a film residual of about 20 percent or more for use against other intelligence objectives. It is understood that in view of the primary objective of this mission--to obtain the maximum number of successive looks at the maximum number of priority missile targets--the camera operations will be conducted on priority missile targets unless forecast weather indicates that the latter are nearly or completely cloud covered.
